...was created to preserve the scientific and ideological heritage and perpetuate the memory of the great scientist and traveler N. N. Miklouho-Maclay and is designed to introduce the achievements of Russia in the exploration of the South Seas region in the XIX century and at the present stage to the modern youth...
The articles, prepared by the specialists of the Russian Academy of Sciences, contain all the significant discoveries of the scientist, the history of Miklouho-Maclay's family.
For easy tracking of all of Miklouho-Maclay’s routes, an online map has been made with more than 150 points of stay, completed with description of the activities in each
The Maclay Coast model layout is made in an artistically realistic landscape style. It is historically, ethnographically and naturalistically reliable.

The model layout showcases five scenes, described in detail in the articles.

It includes landscape, buildings, N. N. Miklouho-Maclay’s hut with household utensils, and personages.
Everyday life of the indigenous people

Russian scientist meets the indigenous people

Hunters and warriors

Scientist at work

Fishing and pirogues
50 exhibits of the material culture of the North-East of the New Guinea Island collected during the period of modern scientific research expeditions in 2017 and 2019 have been selected and described. Each exhibit has a description, usage purposes, and a reference to the same items collected by the scientist in the XIX century.
EXPERITION CLOTHING

- A loose fit cotton shirt with 5 leather buttons.
- A square of silk fabric of dark-cherry colour is used as a band for the neck, covering the neck against the shirt's standing collar.
- A felt hat with a silk scarf tied around it which covers the neck against the shirt's standing collar.
- Shoes are combined leather boots with long stockings, the so-called "bertsy", which go up to the knee. They have been left down.

The Miklouho-Maclay Online Museum features a copy of the traveler's expedition clothing.
Collection of documentaries and feature films about N. N. Miklouho-Maclay has been placed on the Online Museum website.
Books about N. N. Miklouho-Maclay, as well as his scientific works, have been carefully selected and presented.
A single page contains information on the research expeditions in the footsteps of N. N. Miklouho-Maclay conducted in the XX and XXI centuries by Soviet and Russian scientists.
Photos and drawings of the scientist have been carefully selected and presented.
A series of 3 lectures has been developed with the involvement of young scientists on the basis of the museum's exposition and archival materials.

21 lectures were held in different regions of the country in face-to-face and online formats; as a result, at least 525 people could go over the materials.
